Problem Statement

Many organizations still manage employee leave manually using spreadsheets, emails, or paper records. This leads to errors in leave tracking, payroll miscalculations, delayed approvals, and lack of real-time transparency. The absence of a centralized system creates communication gaps and workflow disruptions. Therefore, an automated Employee Leave Management System is needed to accurately track leave balances, streamline approvals, ensure salary compliance, and improve overall organizational efficiency.

Project overview - Introduction

Project Overview – Introduction

Traditional Leave Management Challenges

Spreadsheet

Email
Requests

Paper
Records

- ✓ Errors in leave tracking
- ✓ Delayed Approvals
- ✓ Payroll Discrepancies

Our Solution

- ✓ Centralized Dashboard
- ✓ Real-Time Tracking
- ✓ Automated Salary Calculations

Streamlining employee leave management by automating processes and ensuring real-time visibility.

End User

1. Employees

- Apply for leave online
- Check leave balance in real-time
- View leave history
- Know salary deductions instantly

2. HR Department

- Manage employee records
- Track leave data centrally
- Monitor policy compliance

3. Managers / Team Leads

- View team availability
- Approve or monitor leave requests
- Plan work schedules effectively

Wow factor

- **Automatic Salary Deduction System**

If leave exceeds the allowed limit (3 days), salary is automatically calculated and deducted — no manual work needed.

- ✦ **Real-Time Leave Tracking**

Instant update of leave balance and deductions without spreadsheets.

- ✦ **Centralized Dashboard**

All employee data in one place for better transparency and management.

- ✦ **Error-Free Management**

Eliminates human mistakes in leave counting and payroll calculation.

- ✦ **Beginner-Friendly & Scalable**

Simple system now, but can be upgraded to full company-level software.

Modelling

Result / Outcomes

- Successfully developed a web-based Employee Leave Management System.
- Automated leave tracking with a 3-day limit policy.
- Salary deduction calculated automatically for extra leaves.
- Centralized dashboard displaying employee records clearly.
- Reduced manual errors and improved transparency.

Conclusion

The Employee Leave Management System effectively replaces manual leave tracking methods with an automated solution. It ensures accurate leave balance management, automatic salary calculations, and improved organizational efficiency. The system enhances transparency, reduces administrative workload, and supports better workforce planning.

Source

Future Perspective

- Add Admin and Employee Login Authentication
- Implement Leave Approval Workflow (Manager Approval System)
- Integrate Database (MySQL) for large-scale usage
- Cloud Deployment for company-wide access
- Mobile Application Version
- Email Notifications for leave status updates

Thank You
